Steps to Check-IN/Update/Add the files in Git-Hub:

1. Go to the Directory, where All the Files related to the Web-Page are Saved e.g. /Documents/0_Learning/1_Full_Stack_Development/1_Front_End/Files
2. Open the Command-Line from that Directory
3. Initialise the Gi-Hub from the Command-Line by using a Command: "**git init**"
4. Check the Status of the Previous Operation by using a Command: "**git status**"
5. Type a Command "**git add .**" to Add All the Updated and New Files to the Git-Hub
6. Check the Status of the Previous Operation by using a Command: "**git status**"
7. Type a Command "**git commit -m "Check-IN Comments, if Any!" .**" to Commit All the Updated and New Files to the Git-Hub
8. Check the Status of the Previous Operation by using a Command: "**git status**"
9. Type a Command "**git remote add origin https://github.com/sanjaytamakuwala/TheFullStackDeveloper.git" .**" to Add/Link the Local Directory of the System to the Remote Repository of the Git-Hub
10. Type a Command "**git push -u origin master.**" to Push All the Local Changes to the Remote Repository of the Git-Hub
